

2012 Special Offer: Get a FREE rain sensor and \$50 off installation

Participating Contractors

To receive your free rain sensor and \$50 off installation, you must use one of the contractors listed below.

Please note: Not all contractors serve all types of customers. Please contact a contractor who serves the type of property where you want to have a rain sensor installed.

Rain Sensor Program Requirements

- Rain sensor must be installed on an automatically controlled, in-ground sprinkler system that has been in operation for at least two years.
- Rain sensor must be installed by one of the above participating contractors before December 31, 2012.
- Customers must pay installation costs above \$50 and sales tax on all hardware and labor costs directly to the participating contractor. Total out-of-pocket costs will be different for each customer; ask your contractor for an estimate.
- Customers must provide the name of their water utility and account number to the participating contractor.
- Customers may elect to receive a free rain sensor and \$50 off installation OR a \$75 rebate (see Sprinkler System Rebates). Customers may combine a free rain sensor with a controller rebate.
